

dance & stage flooring

Portable and Semi – Permanent Vinyl Floor Coverings

A range of classic vinyl floors for the studio, stage or events, perfect for a variety of dance genres as well as exhibitions, shows and TV. All are exceptionally easy and quick to lay on a firm, level studio or stage floor and may be purchased by the linear metre up to the stated roll lengths. Edge tapes can also be supplied to fix floors at the perimeter and tape joints. Samples for all floors are available on request.

Reversible Dance Floor

This features a slip resistant matt surface on each side, especially suited to modern dance and ballet. The double-sided construction gives a choice of surface, with two colour combinations. The 1500mm roll widths make it easy to unroll quickly across any dance studio or stage floor. All that remains is to tape the joints and edges. The floor is durably flame retardant, having been chemically treated to withstand a number of cleanings and meets the requirements of BS4790.

Show and Event Dance Floor

A versatile vinyl floor for both dance and event applications, available in roll widths of 2000mm, which is wider than most. Its light weight makes it easy to handle and the perfect choice for all types of event flooring, just unroll it and tape the joints and edges. Available in a wide range of colours, including white that can even be digitally printed. The floor is durably flame retardant, having been chemically treated to withstand a number of cleanings and meets the requirements of BS4790.

Multi-purpose Dance Floor

A high quality floor suitable for every type of dance and temporary or permanent installation. Its heavier construction provides a more durable surface for tap dancing although, as with all vinyl floors, care must be taken to ensure that tap shoes are properly maintained to avoid damage to the surface. The floor has been tested in accordance with US standard ASTM E648-97 Standard Test Method for Critical Radiant Flux of Floor Covering Systems.

Cushioned Dance Floor

A unique double-sided dance floor, offering the versatility of our Reversible Dance Floor, but with the added bonus of cushioning between the two surfaces. The matt surfaces prevent distracting reflections and afford the controlled slip preferred by dancers. The floor has been tested in accordance with the US Fire Resistance Standard NFPA 701.
