

mercury wedge tiles and bass traps

Universal Acoustics Sound Absorbent Foam

The Universal Acoustics range is perfect for use in recording and broadcast studios, music rehearsal rooms, voice-over booths, editing suites and language labs. In fact anywhere requiring efficient sound absorption to improve audio integrity and speech intelligibility. The Mercury range provides a versatile combination of easily installed wall/ceiling absorbers and bass traps.

Description

The Universal Acoustics range of foam products is exclusively designed and manufactured to the very highest professional standard in the UK. The range of Mercury sound absorbing profiles and bass traps are all produced in a striking contemporary wedge design, utilising high density flame retardant polyester foam conforming to UL94 HFI specification.

Installation

The Mercury Wedge Tiles and Bass Traps are easy to install on most surfaces using Cosmic Fluid liquid adhesive or Space Mist adjustable nozzle spray adhesive. The sound absorbing profiles can be glued directly to walls or ceilings or, if preferred, glued to panels, which can be hung or suspended as required, allowing flexibility in terms of relocation.
